

PRIYANKA YADAV

Senior Full Stack Developer

Delhi NCR, India | +91 7827055990 | imyadavpinki@gmail.com

PROFESSIONAL SUMMARY

Results-driven Senior Full Stack Developer with experience in designing, developing, and deploying scalable enterprise applications across government, finance, travel, and e-commerce domains. Strong expertise in React.js, Next.js, Node.js, Express.js, TypeScript, JavaScript, MongoDB, MySQL, AWS, and Docker. Experienced in building cloud-native architectures, secure authentication systems, reusable UI component libraries, REST APIs, AI-powered workflow automation, and CI/CD pipelines. Proven ability to lead end-to-end software development lifecycles, collaborate with cross-functional teams, mentor developers, and deliver business-critical applications. Hands-on experience with ChatGPT, Claude AI, GitHub Copilot, Prompt Engineering, and OpenAI API integrations.

KEY SKILLS

- Full Stack Development
- Frontend Architecture & Responsive Design
- Backend API Development & Integration
- System Design & Scalable Architecture
- Cloud Computing & DevOps
- Authentication & Authorization (OAuth, JWT, RBAC)
- Performance Optimization & Debugging
- Agile & Scrum Methodologies
- Team Leadership & Mentoring
- Stakeholder Management & Requirement Analysis
- AI Integration, Prompt Engineering & Automation
- CI/CD Pipeline Implementation

TECHNOLOGY STACK

Frontend: React.js, Angular, Next.js, Redux Toolkit, Context API, Tailwind CSS, Bootstrap, Material UI, jQuery, HTML5, CSS3

Backend: Node.js, Express.js, Python, Laravel, REST APIs, GraphQL

Programming Languages: JavaScript (ES6+), TypeScript

Databases: MongoDB, MySQL, PostgreSQL

Cloud & DevOps: EC2, Lambda, S3, Azure, Cognito, Docker, Git, Bitbucket, CI/CD Pipelines

AI & Productivity: ChatGPT, Claude AI, GitHub Copilot, Prompt Engineering, OpenAI APIs

Tools: Postman, Jira, Figma, Zeplin, Selenium, Salesforce, Formstack

PROFESSIONAL EXPERIENCE

Cloud Brite Systems India Pvt. Ltd. | Senior Full Stack Developer | Mar 2023 – Present | Chennai, India

- Leading the end-to-end development of **enterprise-grade web applications** for government, finance, and **Salesforce-integrated** platforms using **React.js, Angular, TypeScript, Node.js, Express.js, and MongoDB**, ensuring scalable, secure, and high-performance solutions aligned with business requirements.
- Architecting reusable frontend components, modular application structures, and scalable codebases that

improve maintainability, accelerate feature development, and promote consistency across multiple enterprise projects.

- Designing and implementing robust authentication and authorization mechanisms using **OAuth 2.0, JSON Web Tokens (JWT), and Role-Based Access Control (RBAC)** to ensure secure user access, data protection, and compliance with enterprise security standards.
- Developing and integrating **AI-powered capabilities**, including intelligent document generation, multilingual translation, and workflow automation features, enabling organizations to streamline business processes and improve operational efficiency.
- Deploying, managing, and optimizing cloud-native applications using **AWS services** and **Docker** containers, ensuring high availability, scalability, and reliable application performance across production environments.
- Establishing and maintaining **CI/CD pipelines** to automate build, testing, and deployment processes, reducing manual effort, improving release quality, and enabling faster and more reliable software delivery.
- Providing technical leadership by mentoring junior developers, conducting code reviews, promoting engineering best practices, and collaborating closely with Product, QA, DevOps, and cross-functional teams in an **Agile/Scrum** environment to deliver high-quality software solutions on schedule.

MojoBoxx | Frontend Developer | Sep 2022 – Feb 2023 | Gurgaon, India

- Developed and maintained **airport transportation and travel technology platforms** for major clients, including **SpiceJet** and **Cleartrip**, delivering scalable, user-friendly solutions for travel booking and transportation management.
- Designed and implemented responsive web interfaces using modern frontend technologies, ensuring seamless user experiences across desktop, tablet, and mobile devices while adhering to accessibility and performance best practices.
- Built end-to-end booking workflows, ride management systems, and secure payment integrations, enabling users to efficiently book transportation services, manage reservations, and complete transactions through intuitive digital platforms.
- Developed and enhanced **In-Flight Entertainment (IFE)** solutions, integrating multimedia content, travel-related services, and interactive features to improve the onboard passenger experience.
- Collaborated with cross-functional teams, including product managers, designers, backend developers, and QA engineers, to translate business requirements into reliable, high-quality software delivered within Agile development cycles.
- Optimized application performance by improving frontend rendering, reducing page load times, and enhancing API interactions, resulting in faster response times and a smoother user experience across various devices and network conditions.
- Contributed to the continuous enhancement of travel technology platforms by troubleshooting production issues, implementing new features, maintaining code quality through reviews, and ensuring scalable, maintainable, and production-ready applications.

Cafe24 India Pvt. Ltd. | Frontend Developer | Jan 2022 – Sep 2022 | Gurgaon, India

- Developed and maintained **Notice App** and **SEO Service** applications for e-commerce merchants, delivering scalable solutions that streamlined store management, customer communication, and online business operations.
- Designed and implemented responsive user interfaces, administrative dashboards, and intuitive workflows, ensuring a seamless experience across desktop and mobile devices while improving overall usability.
- Built workflow automation features that simplified repetitive business processes, reduced manual effort, and enabled merchants to manage notifications, SEO settings, and store operations more efficiently.
- Collaborated with cross-functional teams to gather business requirements, develop new features, resolve technical issues, and deliver high-quality software in an Agile development environment.
- Improved merchant productivity and customer engagement by optimizing application performance, enhancing user experience, and delivering reliable business solutions that supported the growth and efficiency of e-commerce operations.

HCL Technologies | Operations Department | Nov 2019 – Jan 2022 | Noida, India

- Coordinated operational activities and customer support processes.
- Worked closely with cross-functional teams to maintain service quality and operational excellence. Collaborated with cross-functional teams including Operations, Quality Assurance, and Technical Support to resolve process and system-related issues.
- Performed data validation, analysis, and troubleshooting to identify discrepancies and ensure data integrity across business processes.
- Assisted in User Acceptance Testing (UAT) by validating application functionality, reporting defects, and verifying bug fixes before production releases.
- Coordinated with development and support teams to investigate application issues, reproduce defects, and ensure timely resolution.

KEY PROJECTS

In-Flight Entertainment (IFE) Platform

Developed a multimedia platform enabling passengers to access movies, magazines, hotel bookings, and transportation services during flights. Designed responsive interfaces and optimized content delivery for an engaging onboard experience.

SpiceJet Airport Cab Booking Platform

Built a large-scale transportation platform supporting airport transfers, rentals, and outstation travel. Implemented booking workflows, payment integrations, ride management, and tracking systems.

Cleartrip Cab Booking Platform

Designed transportation booking modules integrated with third-party APIs for ride scheduling, booking management, notifications, and customer engagement.

Notice App

Developed merchant communication and notification management solutions featuring configurable workflows, campaign management, and administrative dashboards.

SEO Service Platform

Built SEO automation solutions including metadata management, Open Graph configuration, search optimization workflows, and performance monitoring capabilities.

Government & Enterprise Applications

Implemented secure enterprise-grade applications using React.js, TypeScript, Node.js, MongoDB, AWS, OAuth, JWT, and AI-powered automation features.

AI-Powered Document Generation & Translation System

Integrated OpenAI-powered content generation and multilingual translation capabilities to automate document creation and improve operational productivity.

EDUCATION

Bachelor of Computer Applications (BCA)

CCS University | 2018 – 2021

Intermediate

Kanya Vedic Inter College, Ghaziabad | 2017 – 2018

High School

M.B. Girls Inter College | 2015 – 2016
